PHANTOM POWER SUPPLY BATTERY POWER MODULE

The Phantom Power Supply provides ultra-low noise, perfectly balanced phantom power to your microphones anywhere, anytime.

Flexible power options - 9V battery or DC power supply - and three switchable phantom voltages make the Phantom Power Supply ready to power any phantom-powered device.

Rugged and Road-Ready

Run it over with a truck or drop it off a building; it will still power your microphone. The die-cast aluminum enclosure protects internal components. Low-profile switches reduce risk of accidental toggling or damage.

Switchable Voltage Levels

Provides P48 standard phantom power for condenser microphones. Increase battery life by switching to 24V or 12V for electret microphones that can run on lower voltages, such as the Isomax Headset.

Flexible Power Options

Power your microphones with either one or two 9V batteries, or plug into a 2.5mm 9V power supply for continuous operation. The LED indicator blinks when the 9V battery is running low.

Clean, Silent Power

The Phantom Power Supply has an extremely low noise floor for a high signal-to-noise ratio. Optimally balanced phantom power maximizes common mode rejection, while high quality coupling capacitors create a low-distortion signal path.

Power Requirements:

- One or two 9V batteries
- 2.5mm 9V DC negative tip power supply

Voltage Output:

Selectable 12V, 24V, and 48V (P48 Standard)

Low Battery Indicator:

Pulses when battery voltage is low

Input: (1) XLR Female

Output: (1) XLR Male

Dimensions:

4.8 x 2.6 x 1.4 in (121 x 66 x 35 mm)

Weight: 11 oz (0.31 kg) with 2 batteries
